**Russmedia is the most progressive media company in Europe.** That's why we provide a modern, state-of-the-art atmosphere to work in; every employee is encouraged to adopt an entrepreneurial mindset and take responsibility for business outcomes. A high level of commitment to achieving goals is a central aspect of the daily work at Russmedia.

**We are looking for a Data Scientist Engineer (f/m) to join our team and to help taking our business to the next level!**

## Data Scientist Engineer (f/m)

### Job Description

These are your responsibilities

- Build ETL pipelines in Python to extract data from various data sources including external APIs, parse, clean, and load into optimized database tables
- Design high-performance database schemas and optimize SQL queries
- Investigate data problems and identify patterns
- Draw inferences and conclusions, communicate results through reports, charts, or tables
- Work closely with business stakeholders for reporting, data analysis, and ad-hoc data investigations

### Qualifications

This is you

- You have 2+ years relevant experience in Data Engineering
- You are a pro in Python programming
- You are an expert in SQL and database design and bring a good knowledge of data structures, algorithms, and statistics
- You feel comfortable with the AWS ecosystem (S3, Redshift, EC2)
- You have experience with Google Analytics, Google Big Query, Google Tag Manager building ETL pipelines, Unix shell scripting (the workflow management tool Airflow is plus)
- You have an analytical mind and make your decisions with data
- You are involved in the whole process of ML model development. This includes everything from root cause analysis, data-mining and feature engineering to training, validating and implementing machine learning models, computing performance statistics and conducting A/B-tests.
- You are fluent in English (both spoken and written) and a strong communicator

### Additional information

What we offer you

- International colleagues and a great work environment
- Challenges and room for professional and personal development
- Responsibilities from day one and flat hierarchies
- Flexible working hours

### Do you see a match here and would like to join the Russmedia team?

We are looking forward to your application!
